

## clean ryps – textile insert

Doormat with drying cleaning inserts seated in aluminium profiles. Drying inserts are resistant to abrasion, squeezing; absorb moisture well. Units are coupled with stainless steel cord. Designed for entrances with heavy traffic of pedestrians (H 17 or 22 mm), hand transport strollers and market trolleys (only of height 22 mm) – only for indoor use.

**temperature:** over + 5°C

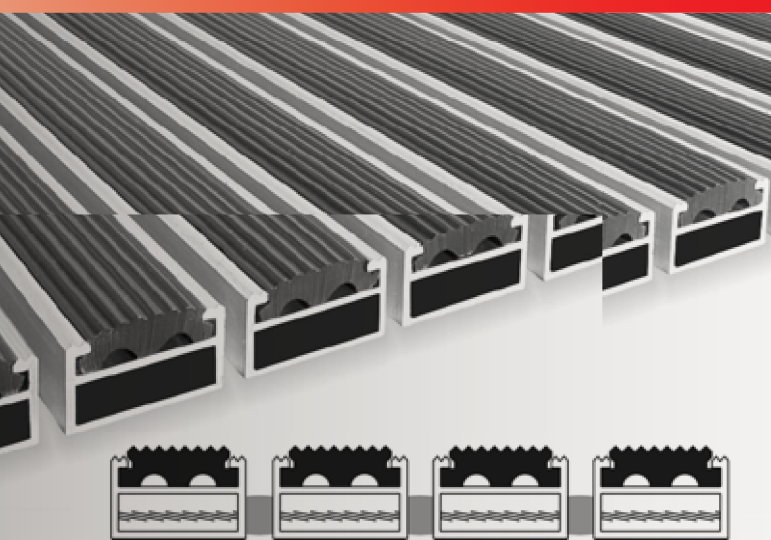

**installation:** in recess of appropriate depth (22 or 17 mm) or on the base in profiled aluminium frame

**doormat height:** 17mm, 22 mm

**insert colour:** gray, black, brown

**dimension:** as ordered

## clean rubber – rubber insert

Doormat with rubber cleaning inserts seated in aluminium profiles. Units are coupled with stainless steel cables. Designed for entrances for heavy traffic of pedestrians (heights 17 or 22 mm), hand transport strollers and market trolleys (only of height 22 mm). High mechanical strength, resistance to moisture, corrosion & temperature changes. Can be used indoors and outdoors.

**temperature:** from -40°C to +70°C

**installation:** in recess of appropriate depth (22 or 17 mm) or on the base in profiled aluminium frame.

**doormat height:** 17mm, 22 mm

**insert colour:** gray, black, brown

**dimension:** as ordered

## clean scrub – scrub insert

Doormat with scrub cleaning inserts seated in aluminium profiles. Units are coupled with stainless steel cables. Designed for entrances for heavy traffic of pedestrians (heights 17 or 22 mm), hand transport strollers and market trolleys (only of height 22 mm). High mechanical strength, resistance to moisture, corrosion & temperature changes. Can be used indoors and outdoors

**temperature:** from -40°C to +70°C

**installation:** in recess of appropriate depth (22 or 17 mm) or on the base in profiled aluminium frame.

**doormat height:** 17mm, 22 mm

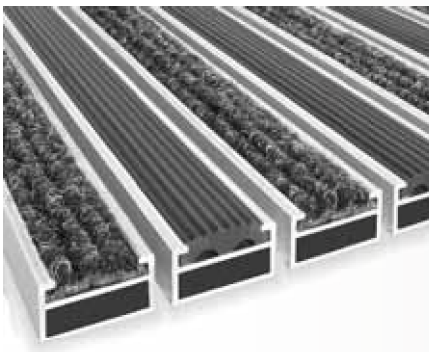

**insert colour:** gray, black, brown

**dimension:** as ordered

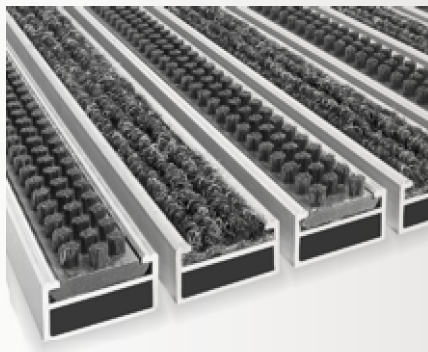

**NOTE: IT IS POSSIBLE TO COMBINE INSERTS OF DIFFERENT TYPES!**
